

Conductor Resistance Verification Report

Generated: 15/09/2026, 20:01:11

1. Verification Settings

Network Expression	R1	Display Unit	mΩ
Resistance Limit	1000 mΩ	Result	PASS

2. Conductor Segments

Ref. / Name	Material	Length	Cross-section	Temp.	Qty. / Wiring	Single Resistance	Equivalent Resistance	Image
R1 通过 铜 Cu (退火) <Busbar>	Copper Cu (annealed)	500 mm	5 mm² 5×1	20 °C	1 pcs Parallel R/n	1.72 mΩ	1.72 mΩ	

3. Calculation Results

Total resistance: 1.72 mΩ

Total conductance: 581.395349 S

Basis: $R = \rho(T) \times L / A$. Identical conductors are combined by quantity and connection type, then combined using the network expression.
